

Public Notice January 2024

Crescent Sanitary District is aware of the letter dated 1/17/23 from Klamath County that was sent to the customers of CSD in January of 2024. The district was not aware that this letter was going to be sent out. The district had an agreement with DEQ stating we would be allowed to decommission the septic tanks for those whom were initially part of the original hookup phase. The district is looking into this and we still plan to decommission these septic tanks when we have the resources in place. This project would be very expensive to outsource. There was supposed to be funds for this but due to cost over run on the project we no longer have that option. We recommend that you do not start the process of having your septic tank decommissioned on your own as we will not responsible. Unfortunately, the district does not have a timeline for this project, we hope to start in the summer of 2024.
